On the title: MMW 'vṛṣa': "Justice or Virtue personified as a bull or as "Śiva's bull Mn. viii, 16 Pur. Kāvyaḍ.; just or virtuous act, virtue, moral merit "Śiś. Vās.;"

On the title, see De Simini 2016:238 n. 13: "As noted by Sanderson [...], this title can have a double meaning, since the 'bull' (vṛṣa) is both a synonym of 'religious practice' and the traditional mount (vāhana) of Śiva.

1.4 The role of the VSS in the Śivadharma corpus

1.4.1 general ideas

- is this text really Śaiva? why in this collection?
- niśvāsa as sadāśiva in ch. 16; Niśvāsa uttarasūtra 5.50-51; see also Kafle Niśvāsamukha p.11ff; ibid. p.12: "The term niśvāsa means sighing. Thus, an alternative

meaning of the Niśvāsatattvasaṃhitā could also be a "sighing tantra." To be more precise, a tantra that originated from the sighing of Śiva. This is to say, the speech of Śiva."

- tattva-system: mati and suśira (ch. 20)
- parallels: MBh, Bṛhatkālottara,
- ch. 21: Viṣṇu; is this a Śaiva text?
- āśramas are in an order different from usual; compare this to NĀT; "Variations on the āśrama-system"

History of Dharmasastra 2.1 pp. 416ff on āśramas

n. 988! see Āpastamba-dharma-sūtra ii.9.21.1: catvāra āśramā gārhaṣṭhyam ācāryakulaṃ maunaṃ vānaprasthyam iti| Quoted by Śāṅkara But the chapters in Āpastamba follow the traditional order. "Āp. places the householder first among the āśramas, probably on account of the importance of that stage to all other āśramas." Kane ibid.

ibid p. 417: person in last āśrama is called: parivrāṭ, parivrājaka(!), bhikṣu, muni, yati. See Olivelle, Patrick. The Āśrama System. The History and Hermeneutics of a Religious Institution. New York, Oxford: Oxford University Press, 1993. [megvan] p.82ff: The Order of Āśramas; "ibid: "In later texts the usual order is student, householder, hermit, and renouncer, reflecting the sequence of the passage from one āśrama to another... In the Dharmasūtras, however, only Baudhāyana and Vasiṣṭha follow that order... A specific order becomes insignificant when the āśramas are taken as four alternative adult vocations." Are they alternative adult vocations here in the Vṛṣasārasaṃgraha? They are numbered.

1.4.2 Vipula

Vipula in the MBh:

MBh 13040016aff

Devaśarman and his wife Ruci 13040017a tasya rūpeṇa → 13040017a tasyā rūpeṇa

all gods, esp. Indra, are in love with her but Devaśarman guards her wants to perform yajña: how to guard her during the ritual? calls his pupil, Vipula tells him that Indra can assume various forms Vipula decides that the only way to protect her from Indra is to magically 'enter' her (with yoga) he tells her stories and enters her

MBh 13041001ff Indra sees the opportunity and enters the āśrama as a beautiful man he sees Vipula's lifeless body Ruci fancies Indra, but Vipula in his body stops her from standing up Indra sings to her beautiful songs he says "I have come for you, I am Devendra, I am in love" Vipula stops her from doing anything Indra is a bit shocked by her not being moved, gets angry and can see now that Vipula is in her Vipula leaves her, enters his own body, and abuses Indra and tells Indra how wicked he is Indra is ashamed and disappears Devaśarman returns to the āśrama, Vipula tells him what happened and Devaśarman praises him

CHECK out Kenji on the Umāmaheśvarasaṃvāda in the MBh, his summary looks similar to the VSS

Kenji: "BDhS 2: Discussion of gr̥hastha. but BDh 2.11.9–34 is a digression on the topic of caturāśrama (vikalpa type, not krama type), and the author denies caturāśrama idea."

1.8 Manuscripts consulted

In the manuscript descriptions below, in addition to some general remarks, I will mainly focus on information relevant to the VSS.

1.8.1 The Cambridge MSS

1. C₉₄(NC94): University Library of Cambridge Add. 1694.1. See a detailed description of this MS at <https://cudl.lib.cam.ac.uk/view/MS-ADD-01694-00001/382> Date of creation: 12th century. The script is Newari/Nepālākṣara. CHECK which term

It is a palm-leaf MTM containing 258 folios. Contents:

- (a) Śivadharmasāstra
- (b) Śivadharmottara
- (c) Śivadharmasaṃgraha
- (d) Umāmaheśvarasaṃvāda

- (e) Uttarottaramahāsaṃvāda
- (f) Vṛṣasārasaṃgraha
- (g) Dharmaputrikā
- (h) Śivopaniṣad

The VSS occupies 45 folios: “it starts on f. 193 (the recto side, online image no. 381, “is an empty folio side, the text itself starts on the verso side); “it ends on f. 239r (and not 193r, as the online description says; online image no. 472). “The text of the VSS is transmitted fully, without any folios or major sections of the text missing. The leaves transmitting the VSS are well-preserved. Some folio sides are faded and most folios are somewhat damaged on the right side, sometimes at other parts, and it seems from the images that some opaque-looking tape has been applied to protect these damaged sections. In my critical edition the broken off, completely lost, /akṣara/s are represented by ×, the illegible /akṣara/s under the tape by □. CHECK The quality of the readings of this manuscript is one of the best, comparable only to K₈₂ and P, making it one of the most important sources for the VSS.

2. C₄₅(NC45): University Library of Cambridge Add. 1645. See a detailed description of this MS at <https://cudl.lib.cam.ac.uk/view/MS-ADD-01645/404> Dated to Nepali Samvat 259 (1138–39 CE).

The script is Newari/Nepālākṣara. CHECK which term It is a palm-leaf MTM containing 247 folios. Contents:

- (a) Śivadharmasāstra
- (b) Śivadharmottara
- (c) Śivadharmasaṃgraha
- (d) Śivopaniṣad
- (e) Umāmaheśvarasaṃvāda
- (f) Uttarottaramahāsaṃvāda
- (g) Vṛṣasārasaṃgraha
- (h) Dharmaputrikā

The VSS occupies 37 folios plus one folio side: “it starts on f. 201v line 4 (online image no. 404), “it ends on f. 238v line 3 (online image no. 478). The readings of this manuscript seem to follow those of K₈₂ remarkably closely in the Śivadharmottara (as observed by De Simini and Harimoto.[fn. Personal communication 01-12-2021] This is more difficult to see in the VSS, but indeed, they closely related. CHECK

3. C₀₂(NC02) CHECK zero; Cambridge University Library Add. 2102. Palm-leaf, 96 folios. Contents:

- (a) Śivadharmottara
- (b) Śivadharmasaṃgraha
- (c) Umāmaheśvarasaṃvāda
- (d) Śivopaniṣad
- (e) Vṛṣasārasaṃgraha
- (f) Dharmaputrikā (only fol. 322v).

For a description of this manuscript, see the online record on the Cambridge Digital Library website: <https://cudl.lib.cam.ac.uk/view/MS-ADD-02102/181> f. 237r Remark: the Vṛṣasārasaṃgraha seems to start in a different hand, but then it changes. In this MTM, the VSS is transmitted in an incomplete form, that is to say, a number of folios are missing (most notably chapters 15–17). The text starts on a folio which is labelled 237r in the online Digital Library of the University of Cambridge (image no. 181). This folio in fact has no visible foliation and is written in a hand that is clearly different from that of the previous one. (That folio, image no. 180, ended with verse 7.122cd of the *Śivopaniṣad*: *yauvanasthā gṛhasthāś ca* [/prāsā]/dasthāś ca ye nṛpāḥ/.) In image 183 (folio 268r, according to the ULC website), the hand changes back to one that is similar to that in image 180. In image 184, the characters for folio number 200+60 are visible (268v, according to the ULC website). In image 186, the folio number 269 is clearly visible (f. 269v). In folio 270v, the continuous text is broken at verse 2.21c (*kāmarū*°), folios 271 and 272 are missing, and the text resumes on folio 273r with verse 3.30b (*ahimsā pa/ramam sukham*). In folio 296v (image no. 234) the text breaks off again at *vātaśūlair upadrutā | śukro* (verse 14.XX CHECK), the next folio being 306r (*carmatās ca dvija-sundariṣu*) (verse 18.XX CHECK) (nine folios and chapters 15–17 are completely missing). Again, there are two missing folios after *bandhus sarvva*° in verse 18.XX CHECK in folio 306v. The text resumes in folio 309r (image 237) with *neṣu ca sarvveṣu vidvān sreṣṭha sa ucyate* (verse 19.XX CHECK). Another folio is missing between *iṣṭāniṣṭadvaya*° (verse 20.XX CHECK, folio 309v) and *snāyu majjā sirā tathā* (verse 20.XX CHECK, folio 311r). The VSS ends on folio 322v (image no. 262) with the concluding colophon *vṛṣasārasaṃgraha samāpta iti*. This folio also contains the beginning of the *Dharmaputrikā*, but this multiple-text manuscript contains no more folios.

1.8.2 The Kathmandu MSS

1. K₈₂NAK 3–393 (NGMPP A 1082/3). Palm-leaf, dated to NS 189 (1068–69 CE), 274 folios. Contents: Śivadharmasāstra (fols. 1v–41r), Śivadharmottara (fols. 1v–52v), Śivadharmasaṃgraha (fols. 1v–57v), Umāmaheśvarasaṃvāda (fols. 1v–32v), Śivopaniṣad (fols. 1v–19r), Vṛṣasārasaṃgraha (fols. 1v–46r), Dharmaputrikā (fols. 1v–12r), Uttarottaramahāsaṃvāda (fols. 1v–24r).

2. K₁₀(NK10): NAK 1-1261, NGMPP A 10/5. Palm-leaf. Contents:

- (a) Śivadharmottara
- (b) Umāmaheśvarasaṃvāda
- (c) Śivopaniṣad
- (d) Vṛṣasārasaṃgraha

The leaves are damaged and slightly disordered. The folio numbers are rarely visible. The VSS starts on exp. 44 (upper leaf, no folio number is visible here). It continues on the lower leaf and then on the upper leaf on exp. 43 (going backwards) up to 1.62 (*viṃśakoṭīṣu gulmeṣu ūrdhva°*). Verses 1.62cd–2.22 seem to be missing. The lower leaf on exp. 43 contains verses 2.23–2.39. The single leaf in exp. 42 contains verses 2.40–3.16a. Exp. 41 contains a single leaf of the *Umāmaheśvarasaṃvāda*, ending in a colophon for its chapter twenty-two, and still going backwards, the preceding folios continue transmitting the *Umāmaheśvarasaṃvāda*. Exploring the presence of the VSS in this manuscript further, one should look at the expositions after no. 44. Exp. 45 contains the end of the *Śivopaniṣad*. The single leaf on exp. 46 is almost illegible but most probably contains a fragment of the *Gautamadharmasūtra*. The second line just above the string hole on the left reads ... *virud vanaspatīnāṃ ca puṣpāṇi svavad ādadīte...*, which is a fragment of *Gautamadharmasūtra* 2.3.25 (12.28). The remaining parts of the VSS are to be found on exp. 47ff. The upper leaf on exp. 47 continues with VSS 3.16b–36ab, while the lower leaf contains a text that I have not been able to identify. The lower leaf in exp. 48 transmits 3.36cd–4.11ab, the upper one 4.11b–30a. The lower leaf in exp. 49 contains 4.30ab–47ab, the upper one 47d–68a. And so on so forth. Thus when reading the text from these images, after exp. 48, one has to start with the lower leaf and continue with the upper one.

3. Kesar 537 (NGMPP C 107/7). Paper, dated to NS 803 (1682–83 CE), 174 folios. - 4. PARIS Nirajan using this MS: The Manuscript NP 57

It is a multiple-text palm-leaf manuscript written in Newari script and preserved in de la collection Sylvain Lévi à l'Institut d'études indiennes, collège de France. The manuscript number is: MS. Skt. 57-B. 23. It contains 249 palm leaves, each folio containing six lines. The following palm leaves are missing: 3, 8, 47, 48, 135, 197, 214 et

- (a) Foliation is in the verso: on middle of the left-hand margin in combination of Newari letters and in the

middle of right-hand in roman numbers by a second hand. There are two binding holes: one in the centre left and one in the centre right. The manuscript is some times damaged in margins with considerable loss of the text. The text is written in a clear hand and contains few mistakes. Although it is undated manuscript, it could be dated to the 11th century AD on the palaeographical grounds.³ It contains the following text in the order they are presented in the manuscript: Śivadharmāśāstra (fols. 1–40), Śivadharmottaraśāstra (fols. 40–93), Śivadharmasaṃgraha (fols. 94–142), Umāmaheśvarasaṃvāda

(fols. 143–172), Śivopaniṣad (fols. 173– 189), Uttarottaramahāsaṃvāda (fols. 190–211), Vṛṣasārasaṃgraha (fols. 212–252), Dharmaputrikā (fols. 253–262). This source contains reliable readings and contains few scribble mistakes. Śivāśramā- dhyāya covers fols. 33v4–37r3.

Nirajan says it reads close to Naraharinātha’s edition

5. München MS Kengo got it in Munich on 16 Nov 2021. VSS starts in 411.jpg ‘cover’ [411.jpg]: ||w|| vṛṣasārasaṃgraha 50 patra ||w|| Text starts in 412.jpeg, f.1r Ends on image 455.jpeg Has interesting readings, but mostly very corrupt and useless. Hand different from that of some of the other texts in this bundle. Collated chapter 1, will probably not go on. Gives number of verses in colophons

M\ 412.jpg, f. 1r start; ten folios are missing:

- f. 5 (VSS 3.4-3.33)*
- ff. 11-13 (VSS 6.20-8.45)

Kengo writes: “411.jpg forms a cover that says vṛṣasārasaṃgraha ---but it is actually 50 verso” samvat 282? [that would be 1161 CE, or is it 292? = 1171 CE] No, maybe 192! see Kengo’s notes! = 1070 CE

”According to Kedārabhaṭṭa in Vṛttaratnākara, a short vowel followed by a consonant cluster (i.e., multiple consonants), although guru by default, can optionally be treated as laghu if that consonant cluster happens to be the beginning of a new word. Implement this option. (With required UI changes, e.g. saying: “this verse can be read as ... if an option is used in places x, y, z.”) ” SOURCE: (<https://github.com/shreevatsa/sanskrit/issues/1>)

SOURCE: (<https://github.com/shreevatsa/sanskrit/issues/1>): “The traditional rule is that the presence of a conjunct consonant (consonant

However, under the influence of Prākṛta and deśa-bhāṣā prosody, and also music, later prosodists give poets the option to either conform to this rule, or to occasionally indulge in an exception. This exception is stated differently by different authors:

All ways of stating the exception cover the example of % " ", but Kedārabhaṭṭa's way doesn't cover the example of " " from the Nārāyaṇīyam. So far I don't see a reason to prefer Kedārabhaṭṭa's formulation over the others.

The exception is not accepted by purists: Shatavadhani Ganesh says that the Sanskrit masters like Kālidāsa, Bhāravi, Māgha, Śrīharṣa, and Viśākhadatta have not freely used this exception (though the masters in Kannada and other languages have). Being more of a "poetic licence" and a violation of the standard rule (only found in later poetry), it is extremely unlikely that any sane poet would have indulged in that exception in all four pāda-s of a verse. Thus it is very unlikely that the program will miss identifying a verse that indulges in this exception. At least, I haven't seen any example from real life so far. (Just saying that because it would be easy to intentionally compose a verse to disprove this!)

- How to deal with the problem of info distributed in two volumes?
- metre
 - muta cum liquida
 - final -am etc. counts as long (reverse of muta cum liquida)
- stem form nouns (prātipadika)
- Special vocabulary/language: karhacit, hṛdi as nominative 10.27cd, tiryā
- Special structures: caturmaunasya vakṣyāmi
- number (e.g. singular next to numerals)
- gender
- me as mayā
- a more or less full collation is important: we cannot automatically reject ‘ungrammatical’ or unmetrical forms because they may well be the ‘original’ one

1.10 Editorial policies

- avagrahas usually supplied but sometimes found in the MSS
- usually 4 pādas to a verse, but I have made arbitrary decisions based on sense-units because none of the sources really indicate where a verse ends (||).
- falsifications everywhere on purpose and accidentally
